DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 14 and 19-26, drawn to a method of establishing a group call between the first and second mobile stations via the first and second proxy switches.
 - II. Claims 16-18, drawn to a method of establishing a group call based on a history of group calls in order to determine whether to establish a multicast session.

3. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as a method of establishing a group call based on a history of group calls in order to determine whether to establish a multicast session. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different & recognized divergent subject matter and separate searches are required for each group.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
